

BREEAM Sustainability

Panattoni is among the market leaders in development of sustainable industrial buildings

- LED lighting with zoned controls
- Outstanding facade and roof insulation
- Modern low-emission gas heating systems
- Thermographic measurements to eliminate heat loss
- Water saving bathroom fixtures
- Smart metering utilities
- Sustainable construction methods

DOORS

- Exterior doors are made of steel and glass, with a height of 2.1m and a width of 3.0m.
- Exterior doors are made of steel and glass, with a height of 2.1m and a width of 3.0m.
- Exterior doors are made of steel and glass, with a height of 2.1m and a width of 3.0m.

FACADE

- Exterior facade is made of steel and glass, with a height of 2.1m and a width of 3.0m.
- Exterior facade is made of steel and glass, with a height of 2.1m and a width of 3.0m.
- Exterior facade is made of steel and glass, with a height of 2.1m and a width of 3.0m.

ROOF

- Exterior roof is made of steel and glass, with a height of 2.1m and a width of 3.0m.
- Exterior roof is made of steel and glass, with a height of 2.1m and a width of 3.0m.
- Exterior roof is made of steel and glass, with a height of 2.1m and a width of 3.0m.

SUPPORTING STRUCTURE

- Exterior supporting structure is made of steel and glass, with a height of 2.1m and a width of 3.0m.
- Exterior supporting structure is made of steel and glass, with a height of 2.1m and a width of 3.0m.
- Exterior supporting structure is made of steel and glass, with a height of 2.1m and a width of 3.0m.

PRODUCTION UPGRADE

- Exterior production upgrade is made of steel and glass, with a height of 2.1m and a width of 3.0m.
- Exterior production upgrade is made of steel and glass, with a height of 2.1m and a width of 3.0m.
- Exterior production upgrade is made of steel and glass, with a height of 2.1m and a width of 3.0m.

OUTSIDE AREAS

- Exterior outside areas are made of steel and glass, with a height of 2.1m and a width of 3.0m.
- Exterior outside areas are made of steel and glass, with a height of 2.1m and a width of 3.0m.
- Exterior outside areas are made of steel and glass, with a height of 2.1m and a width of 3.0m.

OFFICES

- Exterior offices are made of steel and glass, with a height of 2.1m and a width of 3.0m.
- Exterior offices are made of steel and glass, with a height of 2.1m and a width of 3.0m.
- Exterior offices are made of steel and glass, with a height of 2.1m and a width of 3.0m.

FLOOR

- Exterior floor is made of steel and glass, with a height of 2.1m and a width of 3.0m.
- Exterior floor is made of steel and glass, with a height of 2.1m and a width of 3.0m.
- Exterior floor is made of steel and glass, with a height of 2.1m and a width of 3.0m.

HALL INSTALLATIONS

- Exterior hall installations are made of steel and glass, with a height of 2.1m and a width of 3.0m.
- Exterior hall installations are made of steel and glass, with a height of 2.1m and a width of 3.0m.
- Exterior hall installations are made of steel and glass, with a height of 2.1m and a width of 3.0m.
